

Transfer and cooperative network for the application of high value added materials based on carbonaceous particles within the automobile and building sectors

What is CarbonInspired?

CarbonInspired is a Collaborative project co-financed with ERDF funds under the Territorial Cooperation Programme INTERREG IVB SUDOE.

The project aims to approach the use of materials based on carbonaceous nanoparticles in industrial products and processes to place value on the knowledge developed by research centres and universities.

CarbonInspired means:

A boost for the South West European Union

A bridge between basic research and market

A support to the enterprises, specially SMEs

What does CarbonInspired offer?

TECHNOLOGICAL ANALYSIS

Analysis of commercially available materials and processes.
Detection of opportunities for new applications and market demands.
Evaluation of technical, economic, environmental and safety feasibility.

KNOWLEDGE TRANSFER TO YOUR ENTERPRISE

News & Events

Tailor-made training

Potential partners

Reports

Data base with projects & ideas

Workshops

PILOT PROJECTS FOR DEMOSTRATION

Development of materials according to market demands.
Prototype development and validation.
